 at the House for Children and Adolescents

# Main principles in Family services and in The House for Children and Adolescents

- **Easy access**
- **Counselling and early support**, first one to five times evaluation for all new service users
- Patients with psychiatric diagnosis or need of child welfare, child care services directly to specialized services
- **Holistic approach, taking the whole family into consideration, not just the one looking for help**
- **Case manager**
- **Tailored and multiprofessional programmes** for complex situations (f.ex. child welfare and psychiatry)
- **Cooperation within Family Services and with other service providers such as schools, daycare and child health services**
- **Providing services and treatment at children´s daily milieu, natural environment**
